nonprovisional	NO	\$1440	\$300	\$0	\$1740	07/21/2008

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

DETAILED ACTION

Allowable Subject Matter

1. **Claims 1-14** are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1 and 9 are allowed because the closest prior art, Yamauchi et al. (US Patent Number 7200297) by itself or combination with Asahina et al. (US Pub Number 2003/0234922) fail to anticipate or teach the controlling method of wavelength dispersion compensator is acquiring to store data relating to wavelength dispersion values in respective wavelengths in a wavelength band of the incident light so as to correspond to a position of said reflector, before starting the operation of wavelength dispersion compensation by said wavelength dispersion compensator; inputting a setting condition inclusive of the wavelength dispersion values to be compensated at the operation time and wavelength information of the incident light; reading out the data corresponding to said setting condition from said stored data, and based on said read data, judging the position of said reflector, which enables the reduction of wavelength dependence of the wavelength dispersion values in the operation time; and controlling the position of said reflector in accordance with the judgment result, to start the operation of wavelength dispersion compensation.

Yamauchi et al. simply teach the optical component has a wavelength dispersion compensator and controlling the mirror shape of wavelength dispersion compensator. Asahina et al. also simply teach correlation result judging section couples with correlation section and chromatic dispersion setting section.

Claims 2 and 10 are allowed because the closest prior art, Shirasaki et al. (US Patent Number 5930045) by itself or combination with Asahina et al. (US Pub Number 2003/0234922) fail to anticipate or teach the controlling method of wavelength dispersion compensator acquiring to store data relating to a wavelength transmission characteristic of said optical component so as to correspond to the temperature of said optical component, before starting the operation of wavelength dispersion compensation by said wavelength dispersion compensator; inputting a setting condition inclusive of wavelength dispersion values to be compensated at the operation time and wavelength information of the incident light; measuring the temperature of said optical component; reading out the data corresponding to said setting condition and the temperature of said optical component from said stored data, and based on said read data, judging the temperature of said optical component, at which a parameter being a reference of the wavelength transmission characteristic of said optical component is substantially fixed; and controlling the temperature of said optical component in accordance with said judgment result, to start the operation of wavelength dispersion compensation.

Shirasaki et al. simply teach the optical component has a wavelength dispersion compensator and adjusting the temperature of wavelength dispersion compensator. Asahina et al. also simply teach correlation result judging section couples with correlation section and chromatic dispersion setting section.

Claims 8 and 13 are allowed because the closest prior art, Yamauchi et al. (US Patent Number 7200297) and Shirasaki et al. (US Patent Number 5930045) by itself or combination with Asahina et al. (US Pub Number 2003/0234922) fail to anticipate or teach the controlling method of wavelength dispersion compensator acquiring to store data relating to a wavelength transmission characteristic of said optical component so as to correspond to the temperature of said optical component, before starting the operation of wavelength dispersion compensation by said wavelength dispersion compensator; inputting a setting condition inclusive of the wavelength dispersion values to be compensated at the operation time and wavelength information of the incident light; measuring the temperature of said optical component; reading out the data corresponding to said setting condition and the temperature of said optical component from said stored data, and based on said read data, judging the position of said reflector, which enables the reduction of wavelength dependence of the wavelength dispersion values in the operation time, and also judging the temperature of said optical component, at which a parameter being a reference of the wavelength transmission characteristic of said optical component is substantially fixed; and controlling the position of said reflector and the temperature of said optical component in accordance with the judgment result, to start the operation of wavelength dispersion compensation.

Yamauchi et al. simply teach the optical component has a wavelength dispersion compensator and controlling the mirror shape of wavelength dispersion compensator.

Shirasaki et al. simply teach the optical component has a wavelength dispersion

Art Unit: 2613

compensator and adjusting the temperature of wavelength dispersion compensator.

Asahina et al. also simply teach correlation result judging section couples with correlation section and chromatic dispersion setting section.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
